#### pressure drop at 30cSt

### Radiator Style A

material:	aluminum				
working temperature range:	-20°C to +100°C (oil temperature)				
air fin shape:	wavy				
working pressure:	26 bar (static)				

## **Options**

temperature switches IP65	ILLZTH4765K, ILLZTH6065K (page 39)
temperature switches IP69K	ILLZTH5069K, ILLZTH6069K,
	ILLZTH9069K (page 39)

This data sheet and the corresponding scale drawings are to be used as a general guideline and technical overview of our products. Please contact us if more exact information is needed. As we are constantly improving our products, their characteristics, dimensions and weights may also change, although we do our best to incorporate these changes continually, as a assumes no liability for any information therein, any errors, omissions, mispirins, nor any direct or indirect damages, losses or costs resulting therefrom. Any cooling performances and general technical values indicated in this catalogue are measured at a test bench according to as a testing procedures or calculated, based on such tests. Due to different conditions in testing and application environments the performance may also vary by +/- 15%. Because there is no standardized testing procedure, tests used by other manufacturers could have different results. Therefore we recommend all products to be checked under the system operating conditions. This is also true for vibrations and mechanical stress as well as for pressure peaks and thermal stress and any other relevant factors. General tolerances correlated tolerances for casted parts according to SIN 30302-1 (class W4-F-C). The otherances of verding to SIN 30302-1 (class W4-F-C).
